QUESTION 2:

I'm going to read you a pair of statements, and please tell me which one comes closest to your own views, even if neither of the statements matches your views exactly.

We can protect land and water and have a strong economy with good jobs at the same time, without having to choose one over the other.

...or...

Sometimes protections for land and water and a strong economy are in conflict and we must choose one over the other.

QUESTION 2:

I'm going to read you a pair of statements, and please tell me which one comes closest to your own views, even if neither of the statements matches your views exactly.

We can protect land and water and have a strong economy with good jobs at the same time, without having to choose one over the other.

...or...

Sometimes protections for land and water and a strong economy are in conflict and we must choose one over the other.

Table 20-1
 QUESTION 35:
 Now, some of the public lands in [INSERT STATE] have been designated as National Monuments by past Presidents, with protections for natural areas and water similar to those in national parks. The public can recreate or view unique natural, cultural, and historic sites there, and the lands are protected from development and resource extraction.

Would you support or oppose designating more of our existing public lands as national monuments?

Table 21-1
 QUESTION C1:
 Now, some of the public lands in Colorado are designated as National Monuments, with protections for natural areas and water similar to those in national parks. The public can recreate or view unique natural, cultural, and historic sites, and the lands are protected from development and resource extraction.

There is a proposal to designate some of the public lands in the Arkansas River Canyon in Colorado as a National Monument. Would you support or oppose designating these existing public lands as a national monument?

Table 21-2
 QUESTION C1:
 Now, some of the public lands in Colorado are designated as National Monuments, with protections for natural areas and water similar to those in national parks. The public can recreate or view unique natural, cultural, and historic sites, and the lands are protected from development and resource extraction.

There is a proposal to designate some of the public lands in the Arkansas River Canyon in Colorado as a National Monument. Would you support or oppose designating these existing public lands as a national monument?

 QUESTION M2:
 Would you support or oppose Montana increasing the amount of its electric supply that comes from clean, renewable energy like wind, solar, and geothermal from the already achieved standard of ten percent to a standard of twenty-five percent by the year 2025?

Table 28-1
 QUESTION N2:
 As you may know, New Mexico set a standard in 2007 for use of renewable energy - including solar power and wind. It requires major utilities to obtain 20 percent of their electricity from renewable sources by the year 2020, in order to create clean energy jobs, promote energy independence and support locally produced energy. Some people have suggested lowering the standard and requiring less renewable energy, which would bring down electricity rates in the short-term. Would you want your State Legislator to...

Lower the standard and allow utilities to get more of our electricity from non-renewable sources like coal and gas

...OR...

Keep the existing standard for the amount of our energy to be met by renewable sources like wind and solar?

QUESTION N2:
 As you may know, New Mexico set a standard in 2007 for use of renewable energy - including solar power and wind. It requires major utilities to obtain 20 percent of their electricity from renewable sources by the year 2020, in order to create clean energy jobs, promote energy independence and support locally produced energy. Some people have suggested lowering the standard and requiring less renewable energy, which would bring down electricity rates in the short-term. Would you want your State Legislator to...

Lower the standard and allow utilities to get more of our electricity from non-renewable sources like coal and gas

...OR...

Keep the existing standard for the amount of our energy to be met by renewable sources like wind and solar?

Table 29-1
 QUESTION U2:
 Utah state government sets standards for the building of new homes, to ensure that they do not waste energy. Those standards have not been updated in several years. Would you prefer that Utah...

Require developers to meet updated standards to reduce energy waste and reduce home owners' utility bills, even if it increases the price of brand new homes by somewhere between one and eight thousand dollars.

...OR...

Allow developers to build new homes that are not as energy efficient in order to save buyers of newly built homes somewhere between one and eight thousand dollars on their purchase, even if it results in more waste of energy and higher utility bills?

Table 29-5

QUESTION U2:

Utah state government sets standards for the building of new homes, to ensure that they do not waste energy. Those standards have not been updated in several years. Would you prefer that Utah...

Require developers to meet updated standards to reduce energy waste and reduce home owners' utility bills, even if it increases the price of brand new homes by somewhere between one and eight thousand dollars.

...OR...

Allow developers to build new homes that are not as energy efficient in order to save buyers of newly built homes somewhere between one and eight thousand dollars on their purchase, even if it results in more waste of energy and higher utility bills?

Table 30-1
 QUESTION C2:
 Today, state lottery funds are distributed around Colorado for natural areas, wildlife habitat, land along rivers and streams, state and local parks, trails, and nature education. If Lottery funds exceed a certain amount in any given year, the additional money goes to a kindergarten through twelfth grade school construction fund. Knowing this, would you prefer to...

Continue to have Lottery funds distributed to protect natural areas and to school construction.

...OR...

Eliminate this source of funding for land and water conservation and school construction so that all Lottery funds are redirected to the general state education budget?

 QUESTION W2:
 Here in Wyoming, the State Legislature created the Wyoming Wildlife and Natural Resources Trust in 2005. To date, the Legislature has set aside 95 million dollars in the Trust, so that the interest can be used for protecting fish and wildlife, ranchlands, natural areas and water. But, the Legislature COULD set aside up to 200 million dollars under current law, WITHOUT increasing taxes. Knowing this, would you support or oppose the State Legislature fully funding the Wyoming Wildlife and Natural Resources Trust to preserve fish and wildlife, ranchlands, natural areas and water in the state?

Table 31-5

QUESTION W2:

Here in Wyoming, the State Legislature created the Wyoming Wildlife and Natural Resources Trust in 2005. To date, the Legislature has set aside 95 million dollars in the Trust, so that the interest can be used for protecting fish and wildlife, ranchlands, natural areas and water. But, the Legislature COULD set aside up to 200 million dollars under current law, WITHOUT increasing taxes. Knowing this, would you support or oppose the State Legislature fully funding the Wyoming Wildlife and Natural Resources Trust to preserve fish and wildlife, ranchlands, natural areas and water in the state?
