

Using the Sacred Grounds AV System

Touch the screen to wake the system.

If you wish to show video, select your source- the projector will turn on and the screen will lower. If the screen does not come down, try pressing the projector ON button. Set your computer audio output to Crestron if connected via HDMI. If you wish to use your phone headphone jack/3.5mm adapter, connect to the 3.5mm cable in the wall plate. You can also pair your device with the Belkin J33 Bluetooth.

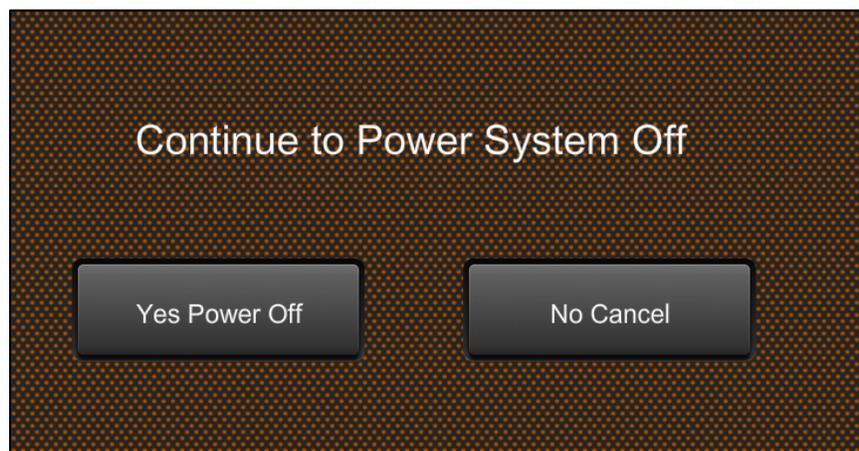

If there is an event using the sound system in the chapel, you can monitor it in Sacred Grounds with the Chapel Feed control.

There are three mic jacks available*, press the MICS button to bring up the gain controls. Press the Audio Control button to return to the main audio page.

When finished, press the System Power button, and confirm you want to shut down, or cancel, on the following page.

* The storage room has three mics, stands, and cables. There are also a mixer and two speakers in the event you need more than three sound system inputs or otherwise find the built-in system to be insufficient for your needs.

For access, contact Chapel staff or Campus Safety.
