

The HVAC shop maintains all campus heating, cooling, ventilation, and indoor air quality systems. In addition, the HVAC shop insures the timely operation and system integrity of all food service and recreation systems including the Schlessman Pool and the Honnen Ice Arena.

Central Plant operators are responsible for the reliable, safe and efficient operation of the campus central plant. The central plant is operated 24 hours a day 365 days a year. They are also responsible for the maintenance of the high temperature hot water and chilled water distribution systems. They take after hour's calls from campus and coordinate the response of the Operations & Plant department to ensure timely response to campus needs.

The campus Controls Specialist is responsible for campus wide Building Automation Systems and assisting with the resolution of indoor air quality control issues for existing and new building systems.
